

QUALITY & ENVIRONMENTAL POLICY STATEMENT

The mission of **DIGIT** Site Services Ltd. is:

**To be a key player in the provision of minor civil engineering,
landscaping and waste management services
to our Clients.**

DIGIT Site Services Ltd. is committed to providing the best in Client satisfaction through understanding their business needs.

To continually achieve this objective we ensure our staff influence the services our Clients demand by working closely with them.

To support this approach each of our business processes, which is likely to have an impact on the environment and the service we deliver, forms an integral part of our Business Management System.

As a key part of the way we work this systematic and proactive approach meets our business, environmental, legal and other requirements and addresses the requirements of both the International Quality and Environmental Management Standards BS EN ISO 9001 and BS EN ISO 14001.

The Management of DIGIT Site Services Ltd. promote and encourage prevention of pollution and continual improvement through regular monitoring of environmental and legislative requirements, and business performance objectives by all staff to ensure good management practices are adopted during the contract lifecycle.

Our Business Management System creates a platform across the business for continuous improvement. We place great importance on the involvement of our staff. To this end, training needs are regularly reviewed to ensure work competencies constantly keep us at the leading edge of Client and market demands.

By adopting this approach, sound management controls, linked to effective and safe planning of all work is undertaken to benefit and add value to our Client service requirements.

This policy is outlined and available to the public through access to our website.
